

## **2004 IPHC SSA Survey Station Information by Charter Region**

This package contains data from the 2004 IPHC standardized stock assessment (SSA) survey, by charter region. The gear consisted of fixed hook, 1,800-foot skates with 16/0 circle hooks spaced 18 feet apart. In Area 2B (Vancouver, Goose Is., St. James, and Charlotte) and 3A (Fairweather, Yakutat, Prince William Sound, Seward, Gore Point, Portlock, Albatross, and Shelikof) eight (8) skates were fished at each station with all halibut from the first three (3) skates being PIT tagged and released, with the remaining five (5) skates being subject to standard survey protocols. Please be aware that these tables list all fish from each station, whereas only legal-sized animals were retained from 5 skates worth of gear. In all other regions, 6 skates of gear were fished, with all legal sized animals retained. Please note that all poundage listed on the following pages are calculated from length weight tables. For information on actual poundage landed from each region in 2004, see Appendix 4 of the 2005 Bid Specifications package.
