**COMPLETION AND SUBMISSION OF LOGBOOKS  
FOR THE U.S. COMMERCIAL HALIBUT FISHERIES**

The International Pacific Halibut Commission (IPHC) has collected logbook information since the 1930s. The catch per unit effort, gear, and location information from the logbook is essential for the annual stock assessment and aids in determining the condition of the halibut resource. We have been successful in managing the halibut resource primarily because of cooperation from participating harvesters.

The information needed for our analysis is indicated on the sample log sheet. IPHC regulations require the operators of any vessel commercially fishing for halibut, that has an overall length of 26 feet or greater, to maintain a logbook. The exception is that vessels incidentally retaining halibut during the Area 2A salmon troll fishery are not required to maintain a halibut logbook. Please complete your IPHC approved log as accurately, legibly, and completely as possible. Written logs, with all the elements listed in the example, provide us with the best possible information. For the 2010 season, we will have samplers in the ports listed below:

Bellingham, WA	Dutch Harbor, AK	Homer, AK	Juneau, AK	Kodiak, AK
Newport, OR	Petersburg, AK	Saint Paul, AK	Sand Point, AK	Seward, AK
Sitka, AK				

Making your complete and legible log available to the port sampler is the most efficient way to provide accurate data for inclusion in the stock assessment. All detailed trip information is kept strictly confidential and cannot be subpoenaed under IPHC immunities. Your working directly with the port samplers allows us to clarify questions we may have regarding the details of the log information. It also allows harvesters to provide direct feedback to the Commission and an opportunity to have any questions answered. If you need a new logbook, one can be obtained from any port sampler or from the Seattle Office. At the end of the fishing season, if an IPHC port sampler has not already collected logbook information from some or all trips, please tear out the IPHC copy from your logbook, or make a copy of the information, and send it to the Seattle office.

Please refer to the next page for an example of a log sheet and the information we need for stock assessment. Please take care to print legibly and complete all required elements to ensure regulation compliance.

Thank you again for your continuing cooperation.

# IPHC HALIBUT LOGBOOK
